It is time that the people of the State should begin to prepare for our Centennial State Fair; we can assure them that in every respect it will be far superior to those which have preceded it. This fact alone will be sufficient compensation for all the labor and expense which is inseparably connected with efforts to make a fine exhibit of industries. We reiterate our former assertion that our next will be our best Fair. We know that our managers at home are exerting themselves more than ever, if possible, so that success will fitly crown the occasion. Messrs Chamberlain and Leete are devoting all their time and money to accomplish such a result. There is not a day passes over their heads but in some measure inures to its benefit, through their actions. Everything that can be done is being done to improve the grounds of the Agricultural Society, so that the accommodations will be such this year that no exhibitor may have cause for complaint. The speed ring, by all odds one of the very best on the coast, is receiving due attention, and by the opening day will be one of the fastest tracks in the United States. The people will be offered many superior inducements—better speed contests, finer display of blooded stock, a much more interesting exhibit of the cereals, etc. Hence our desire for the people to prepare in time. Next month there will be a rush of stock here from California. The District Fairs will have closed and everybody will be coming to Reno, as our State Fair this year comes in ahead of California's. The flattering success our Agricultural Society has achieved in the past is nothing in comparison to what will be attained in the future. What has been done already has been sufficient to place it on a permanent and solid basis, and to-day the Nevada State Agricultural, Mining and Mechanical Society stands well not only at home, but abroad. Its reputation for fairness and liberality is firmly fixed, and it is liked all the better for it. Our attractions this year will draw an immense crowd. Let those in whose power it may be to assist in contributing to the success of our next State Fair do so with alacrity, and the pride we feel in our State shall be swelled all the more.

BANK STATEMENTS.

The near approach of the session of our Legislature suggests to our minds a piece of legislation, the operation of which will, in our opinion, result in good to the public, and also be of benefit for those conducting a banking business in the State, where such business is conducted on the correct principles of banking. What we want is a law requiring published sworn statements, semi-annually, say in January and July, from all the banks and bankers doing business in the State. Such statement to include the amount of capital actually paid into such corporation, or into such banking business provided that nothing shall be deemed capital actually paid in except money-bone side paid into the treasury of such bank, and under no circumstances shall the promissory note, check or other obligation of any Director or stockholder, or of the proprietors or proprietor of any such bank, be treated, computed, or in any manner considered any part of such actually paid in capital. And also file for record a like sworn statement of the actual condition and value of its assets and liabilities, and where said assets are situated. A law similar to the above is now in full force in California. Nevada should be protected in the same manner.

Hot.—Yesterday was the warmest day of the season, the thermometer marking 98° in the shade.

THE VICE-PRESIDENCY.

The New York *Herald* publishes a long article on the subject of the Vice Presidency, and the importance of the position as under certain conditions affecting the destiny of the country and the necessity of having the right man nominated to fill the position. It says the contingencies of death, resignation or removal render the office of great importance. Editorially, it hopes no man may be elected by either party for the second office whom it would be unwilling to trust with the duties of the first office. The necessity of the political conventions carrying out the suggestions of the *Herald* is clearly apparent to all. We earnestly hope they will not disregard them.

RAILROADS TO BE INVESTIGATED.

The House Committee on Commerce have agreed that at its next meeting it would take up and consider Hopkins' bill to prevent unjust discrimination by common carriers, and render a decisive decision on it. The Chairman was authorized to appoint, under a House resolution, a subcommittee of three members, to sit during the recess and investigate whether the railroads engaged in inland commerce and inter-State communication have conspired to discriminate against certain industries. The Committee will not have a great deal of trouble in disclosing such conspiracies. Let them commence on the Central Pacific.

CONGRESSIONAL INVESTIGATIONS.

We read many comments on the "Investigations" going on by Congressional committees, some of the criticisms being staidly harsh and unjust. But it must be allowed that said "Investigations" have done some good—exposing frauds and plunderings that, if unchecked, would soon empty the National Treasury. Let us have more of these disclosures, so that the toiling classes, who now are working on reduced time and decreased wages, can see how the blatant politicians, who rule the country, are the chronic robbers of all our industry.

Prospects at Cincinnati Viewed From an Anti-Blaine Standpoint.

[Cincinnati Special to S. P. Post, June 12.] Blaine's sudden illness has set everything afloat. I first learned it on the train en route. At first some thought it was one of his bold coups to catch the sympathy of the convention. To understand this it may be stated that the Democrats are withholding whatever damaging evidence they have against Blaine in hopes he will be the Cincinnati nominee. He has made several sorties at them, and they have calmly submitted, and his harmless sorties he himself adroitly metamorphosed into great victories, consequently his sudden illness was pronounced as another trick for the nomination, relying upon the strength of the party to carry him successfully to an election if he only managed to be nominated. When we left Washington it was generally understood among the leading Republicans that to avert Blaine's nomination everybody was in duty bound, even at the expense of personal aspirations. Had Blaine died the whole programme would be changed, and each fellow set up for himself. As it is, "anything to beat Blaine" appears to be the watchword. Blaine stood appears to be falling off during the past two or three days. Shrewd Republicans fear a merciless analysis of the Fisher letters more than anything else. Blaine being the top man, has powerful following, and the nomination may be within reach, but I think his Southern strength, combined with Indiana, is the entire situation. Bristow's friends claim a large revolutionary interest in the Blaine votes if the latter dies or steps out of the fight. There is a rumor of a combination between Morton and Bristow, but I cannot learn anything reliable. Conkling is the favorite candidate of the Administration. He has the confidence of the Senate, while his ability to carry New York is conceded. His integrity as a statesman cannot be impeached. He is pressed by a powerful delegation from New York, and has votes from nearly every State, but with less on the first ballot than either Morton, Blaine or Bristow. It is my impression that his chance for the nomination is better than Blaine's. California and New York are in this fight together. Hartman's hardly amounts to a candidacy; Hayes, of Ohio, is well in hand and the Ohio delegation is enthusiastic over him. As far as can be seen Conkling and Hayes seem to be the favorite ticket of a great many delegates. Washburne is entirely out of the pool. I have seen Evans, Martin and Whitney of our delegation, and Wren, Clapp and Senator Jones, of Nevada. Senator Jones has a house at 230 Vine street, the headquarters of the California and Nevada delegations. All telegrams to Californians will be likely to find them there. R. L.

THE CENTENNIAL EXPOSITION.

Display of Publishing Houses—An Old Bible—Planes—Railroad Signals—Telegraphic Curiosity—Nevada People Seeing the Sights—Other Notes.

PHILADELPHIA, June 3, 1876.

EDITOR JOURNAL: As it is about time we were saying something of the Main Building, we will do so, though we cannot describe it as minutely as we have some of the others, there being such a profusion of goods there that it will be impossible to speak of all or even half of them, and we can only mention some of the most interesting. We will first speak of the

AMERICAN

Part of the building. In the southeast corner of the Main Building are displays of publishing houses. That of Sower, Potts & Co., of Philadelphia is interesting on account of some old books and publications that they have on exhibition. The oldest of these is

A BIBLE,

The first printed in America in a European language, published in German at Germantown in 1743, by Christopher Sower, Sr., who also established the first type foundry in America. Then there are the 2d and 3d editions, published in 1763 and 1776 by Christopher Sower, Jr. Also a good many other books and one or two newspapers and almanacs published by various Sowers. An interesting thing in

PIANOS

Is the oldest piano in America, made in 1745 and having a range of only four and a half octaves. It looks quite small and insignificant beside the grand pianos of the present day. It was once the property of the eminent composer Balle, and is exhibited by Charles M. Stieff, piano manufacturer, Baltimore. The Electric

RAILROAD SIGNAL

Company of New York, exhibit a system of railroad signals based upon the principle of making the wheels of a car connect the two rails in an electric circuit, thus making the signal machinery automatic and instantaneous. And it is not at all expensive, as no wires are required worth speaking of, the rails of the track being used as a conducting medium, and it is only necessary to connect the batteries and signals with them. In a week or ten days this system will be in operation on the narrow-gauge railroad around the grounds, and can there be studied much more satisfactorily than it can with the small working model in the Main Building. The Western Electric Manufacturing Company, of Chicago have some very nice

ELECTRICAL APPARATUS.

One piece, for example, is Gray's patent telegraphic instrument which, it may be, will eventually revolutionize telegraphy. The principle upon which this is worked is the well known one that a vibratory body will respond only to vibrations of the same pitch as that to which it is attuned. In other words, if a c sounded for a violin, a c tuning fork placed at a little distance will give forth the sound of c also, but if a, b, e, or any other note be sounded the fork will not vibrate, but will remain entirely silent and unaffected by the vibrations from the violin. Now vibrations can be transmitted by electrical apparatus as well as by air, and one will transmit as many different ones at once as the other. So, then, an instrument tuned to a certain key is made to vibrate at one end of a wire, and another one at the same pitch is placed at the other. When the first one is sounded the second will respond, or sound too, and this sound can be broken up into dots and dashes by an ordinary Morse key. As many instruments as there are notes in the octave may be placed together at the end of the wire and each will respond only to its own tone and no other, and

DIFFERENT INSTRUMENTS

May be sounding different tones at the same time without in the least interfering with each other, so that eight messages may be transmitted on one wire at the same time, thus making one wire do the same amount of work that eight can accomplish by the ordinary method. When a telegraph company has thousands and thousands of miles of wire to keep up, this will be an immense saving to them. In a few days this company will have instruments located some distance apart in the Main Building, and visitors can see the apparatus in actual operation.

A FOGHORN

Has been put over the U. S. Government building, and every few minutes an unearthly noise breaks on the ear, grating, rasping and tearing one's sensibilities, and being of course heard all over the grounds. Foghorns are very important things, and doubtless save a great many lives, and it is important to make all the improvements in them that can possibly be made, but in spite of all these things, we think the unearthly screeching that every now and then grates on the nerves of the visitor at the Centennial, is entirely unnecessary, and some regard should be shown to their feelings. The following Nevada people have arrived here: Hon. Thomas Wren, M. D. Foley and Rev. J. McLain, of Eureka; Mr. Lambert, Robert Apple, Mrs. C. C. Stevenson and Mrs. Drexler, of Virginia; Misses Clapp and Babcock and Mrs. Whitehill, of Carson. Mr. John Mackay and Hon. Thos. Williams, of Virginia, are expected here every day. Harry Mighels and wife, of Carson, will arrive here on Monday, the 5th. Quite a number of Californians have been registered at the hotels within the past few days. FRAZEE.

SHOOTING AT PIUTES.

An Indian Killed for Attempting to Get His Wings.

Recently an Indian was killed and another wounded at Shinn's ranch, some where near Smoke Creek, on the old Honey Lake road. The Indian, it is alleged, had been working for Shinn for some time, and Shinn refused to pay him for his labor. The Indian's idea of justice was to take a horse for the debt, and he went to the corral in which there were horses, with another Indian for that purpose. Young Shinn, a son of the owner of the ranch, fired at the Indians, killing one and wounding another. Yesterday a relative of the murdered Indian came here to consult Naches about the matter, and to devise some method of getting redress. Naches has concluded to bring the matter before Col. Barnes, the Indian Agent at the Pyramid Lake Reservation, as soon as he returns from San Francisco, where he is on a visit. Meantime, to prevent any further trouble, Naches has warned the Indians hereabouts to keep away from the Smoke Creek country for the present, and he went to the Big Meadows last evening to caution the Indians in that vicinity against going there. If the Indians tell the truth about the affair, Shinn is to blame, and the authorities ought to inquire into the matter. We believe the ranch is in Roop county, nearly due west from Mill City, and Roop county, having no organization, is attached to Washoe for judicial purposes. Naches is very desirous to have the affair investigated, as he does not want any enmity between the whites and members of his tribe.—*Winnemucca Silver State*.

The Washington *Herald*, of June 4th says: Senator Jones gave a large dinner party on the previous Friday evening, among the guests being the President and Senators Howe, Conkling, Cameron and Logan. The Senator's wife has not been in good health this winter, and this was his first dinner party.

The National Gold Medal was awarded to Bradley & Rolston for the best Photographs in the United States, and the Vienna Medal for the best in the world.

PETTY THIEVES.—Our merchants

have for a long time been unable to let boxes of merchandise lay out side of the door over night, because whenever they have done so they have invariably been broken open and if the contents were desirable taken them away. One evening this week a merchant left a box of brick for cleaning cutlery and another of stone jars in front of his store. The next morning he found that each case had been broken open, the contents ascertained and left. There are entirely too many gentlemen of leisure laying around. We call upon our officers to enforce the vagrancy act.

KNIVES.—Beck & Co. have just

received from the West Empire Manufacturing Company, of Connecticut, a lot of knives, which form quite a curiosity, as there are 204 different kinds in the lot, from which a person can select any conceivable style of a pocket knife, at prices ranging all the way from ten cents to three dollars. The Co. from which these samples have been received is the largest of its kind in the country, and their work has never been excelled.

The county jail holds seven prisoners.

RENO STATE PRISON.—The walls of three sides of the State Prison grounds, with the guard towers, are now completed, so that visitors can ascend to the top of the wall by the spiral stair case in each tower and view the work and grounds. To complete the contract, there is yet to be finished seventy-five feet of the north wall, including the entrance gate. This will take six days, providing the coping to finish with is delivered on the ground. The work is now being pointed, which gives the wall a much more finished (mechanically) appearance.

A CONVENTION OF "THE BOYS."—A mass convention, says the Virginia Chronicle, of vags, tramps, three-card monte men and check guerillas will meet at Reno in a few days. Virginia City and Gold Hill will send strong delegations. The object is to organize for the Summer campaign, take protective measures against the encroachments of the authorities and send a representation to the Centennial. We think the Chronicle lies.

YESTERDAY Kemp, the Flying Gallery man, took a photograph of our steamer, together with a number of the boys who were standing around. These pictures will be for sale to-day at \$1.50 each. He also has a portrait of the school house with all the children grouped in front of the door.

FOUR men have been arrested at Verdi for stealing saw-logs. It appears they were collecting all the logs that had floated down the river, and going upon other parties' lands to pick them up, and at the instance of the latter complaint was made against them.

FLAGS, bunting, etc., in large quantities at Jamison's, from the smallest clear up to the largest. All patriotic people will do well to see Mr. Postmaster Jamison and secure their stars and stripes by the approaching 4th.

GOING EAST.—Mr. Jamison, our worthy P. M., leaves for the Centennial to-night. The old man is deserving of a fine trip, and we wish him the most enjoyable one imaginable.

LETTER DETAINED.—There is a letter in the postoffice addressed to Fannie Harrison, San Francisco, which is detained here for lack of the requisite 3-cent postage stamp.

SODA.—Jose's soda factory is now in successful operation, on Virginia street. Jose makes a splendid article, and easily finds a sale for all that he can manufacture.

LINENS.—The snow still lingers on the top of Peavine mountain. The patch is growing beautifully less every day though.

CORNER STONE.—The rock intended as the corner stone of the new Old Fellows Hall is being put into shape by an experienced stone cutter.

M. C. LAKE left for the Centennial last night. With the Shoemaker family and several others, he will not be a stranger there by any means.

PEACHES and pears have appeared in our markets. The small fruits and berries continue in plenty, while the vegetables are a little scarce.

WANTED.—A house containing four or five rooms, wanted by the 1st. Apply at this office.

THE GRANGE.—In society, in all political organization and in all orders are persons who consider it only their duty to exist or to be seen, so in the Grange a great many seem to think that if they attend the meetings and look lazily around they are doing their duty and that this is all that should be expected of them. Every one ought to consider it their duty to say or do something to interest and instruct others. If all would feel the necessity of such a course no one could go away from the Grange meeting dissatisfied. Let each one when called upon to say something, or to write an essay on any subject be willing to do so. If you have not much to offer say something and do it in a way that shows that you are interested and willing to contribute your knowledge and experience for the benefit of those with whom you are associated, and if all will do so we can assure you that you will all be benefited and better pleased with your Grange meeting, and you will find that all will take pleasure in attending, and the hours spent in the Hall will not drag but pass off pleasantly and profitably. Try it.—*Sac. Agriculturist.*

TELEGRAPHIC NEWS.

WESTERN DISPATCHES.

Instantly Killed.

AUSTIN, June 13.

Yesterday morning at the Pacific Company's mine a miner named John Martin pushed a car into the shaft from the 400-foot station. The unfortunate man was drawn into the shaft and falling 150 feet to the covered station at the 550-foot level, was instantly killed. Water having risen in the shaft to within 80 feet of the 400-foot level much difficulty was encountered in the efforts to recover the body. Deceased was an estimable young man, a native of Cornwall, England, and aged 25 years. The funeral will take place to-day under the auspices of the Miners' Union.

San Francisco News.

San Francisco, June 13.

The dissatisfied stockholders on the Phil Sheridan mine met yesterday and appointed a committee to examine the accounts and take any necessary action.

The South Chariot soreheads also met last evening and listened to the report of the committee appointed to investigate affairs, which were found in an unsatisfactory condition, of money being in the treasury, and the miners suffering for pay. An attempt will be made to obtain a majority of the stock and oust the present management.

The records show that yesterday was the hottest day ever experienced in San Francisco since they have been kept. At one time the thermometer touched 95 in the shade.

Three hundred and fifty-six Chinese arrived yesterday, on the American ship Mary Whitridge, from Hongkong.

There are now in the pest-house thirteen Chinese lepers.

The physicians recently appointed to vaccinate the people free of charge have closed their offices, having vaccinated about 20,000 people.

A fire on Folsom street, near Fifth, yesterday, damaged a number of frame dwellings to the amount of about \$3,000. The cause of the fire was crackers.

The Banker Hill Association will celebrate the anniversary of the battle by a picnic to Belmont. Salutes will be fired from the forts in the harbor and the French man-of-war.

The Mayor appointed Jas. E. Hughes, J. G. Goldsmith and J. G. Pesinger, scorers in the O'Leary walking match. Three of the amateurs who are to walk against O'Leary are Under Sheriff Nealon, Frost, city editor of the Evening Post, and Phelps, a reporter on the Alta. A fourth will be added.

The business of the National Gold Bank and Trust Company which reopened yesterday shows a most gratifying feeling of confidence in the management of the concern. The deposits yesterday amounted to \$80,000, only \$1,000 being withdrawn.

OUR San Francisco correspondent says there is considerable dissatisfaction among Crown Point stockholders because the record of last year's operation shows that the ore crushed did not yield enough to pay the cost of extracting and crushing. In such a case as this, however, it does not follow that the stockholders have been unfairly dealt with. If the ore in a mine assays below the working cost in one spot, it may prove much richer in another. After taking out a hundred tons of poor ore, the miners may come upon a body of good ore, and the poor ore must be got out of the way. Thus the expense of extracting the ore is necessarily incurred before its average value can be ascertained. If, after extraction, it is found not rich enough to pay the cost of extracting and milling, the next question is, will it pay a profit to mill? If it will it is decidedly wiser to send it to the mill than it would be to leave it in the dump pile.—*Va. Chronicle.*

THE STATE AND COUNTY BONANZA DIVIDEND.—Last Saturday the Con. Virginia Mining Company paid over to Assessor Gracey, of Storey county, \$130,265 46, that being the amount of the tax on the bullion product of the mine for the quarter ending March 31, 1876. At this rate the annual tax paid in by this single Mining Company will amount to \$531,061 84. The product of the California mine for the other three quarters of 1876 will be nearly, if not quite equal, to that of the Con. Virginia, so that the contributions of the two mines to the local and State governments will not fall much below a million dollars.

BELLEVILLE COMING TO THE FRONT

A Lively Camp in Esmeralda County—Some Fine Mines in Operation.

Belleville has grown to be quite a lively camp, with every prospect of becoming a mining town of considerable importance. It already ships about nine bars of bullion daily, and has five or six hundred men at work in and around it. During March the Northern Belle mine, which runs a twenty-stamp mill, shipped \$256,000, and is building another 20-stamp mill. During the same month the General Thomas, with a 10-stamp mill, shipped \$215,000, and is building a \$90-stamp mill. The ore of these two mines contains base metal, and has to be crushed and roasted. Two or three weeks ago, however, a little mine was discovered about 20 miles northeast of Belleville, and seven or eight miles from Soda Springs, yielding free milling ore. There is said to be plenty of work for carpenters, woodchoppers, etc., at the camp. The new road from the Mound House is now finished to Mason Valley, and lively travel has commenced. Lorenzo Dow has put on a stage and fast-freight line from Virginia to Belleville. The stage leaves Virginia City every Monday morning at 7 o'clock, passes through Gold Hill, Silver City, Dayton, Mason Valley, and reaches the Reservation at the head of Mason Valley, on Monday night, arriving at Belleville Wednesday noon. Fare \$20 each way. There is great complaint in Belleville and along the road, in regard to the irregularities of the present mail service, and an effort is being made, by petitions to Washington, to have the evils remedied.

MR. KEMP begs leave to state to the residents of Reno, and vicinity, that he is prepared to take Photographs of every description, including views of houses, horses, and coping of all kinds a specialty. Satisfaction guaranteed in all cases. Flying Photograph Gallery, opposite the Opera House.

For the best pictures, go to Kemp's Flying Gallery.

WANTED to rent for one year, a decent small sized dwelling.
* BURNER, Photographer.

FOR RENT.—After June 15th, a large shop will be for rent. For particulars inquire of
19-31. L. WINTERMANTLE.

FOR SALE.—A span of draft mares. One six and the other eight years of age, and sound in all respects. Weigh 1,300. Inquire of John Hoy.*

HELLO Mary, where are you going? Why Alice, I am going where everybody goes, to the Great Flying Gallery to have my pictures taken. Wait one minute, until I take down my crimps, and don my pull-back, and I will go with you.*

PIONEER BARBER SHOP.—Messrs. Eakle & Morris are still at the old stand. Three first-class artists can always be found on hand, who are second to none on the Pacific coast. There is nothing so luxurious on a warm Summer day, than to sit under the manipulations of one of these artists. If you are troubled with dandruff, have a headache, or a fit of blues, an application of our justly celebrated "Tonic Magnif" will remove the same as if by magic. Ladies and children wishing anything in the line of hair cutting and shampooing can be waited upon at their residence by Prof. Morris, who is no novice in the business. Hair restoratives, hair oils, bay rum and everything appertaining to the business always on hand. Give us a trial.
j2-1m. EAKLE & MORRIS.

THE only place to get good pictures—at Kemp's Great Flying Gallery.
